Investigative Threat Assessment Process

The instructor's real case studies and tabletop group work will make you a confident threat assessor even if you have never completed a threat assessment before.

Course Description

In this 7-hour course, you will learn a threat assessment-intervention model that can be used by law enforcement officers, educators, mental health professionals, and others involved in school or public safety. It outlines a methodical procedure for evaluating a threat, a person making the threat, with the aim of reaching an informed judgment on how to manage the subject of concern. Course includes:

- Threat typology
- Understanding the motivation behind threats
- Multi-pronged assessment model
- Identifying behavior and personality traits that can lead to violent behavior
- The multi-disciplinary team approach
- Intervention process and threat management
- Role of law enforcement
- Case study review
- Tabletop scenarios

Attendees will receive a complete threat assessment guide and worksheets.

Total Safety Solutions

Established in 2012, Total Safety Solutions delivers training, speaking and consultancy worldwide in the field of Internet safety, cyberbullying, behavioral threat assessment, violence prevention, and school safety. Our programs lead in the field of safety education and awareness and are delivered to school communities, public groups, corporate teams and government organizations in the workplace, and at conference or seminar environments. Delivered nationally, our training programs reach over thousands of people each year.

Instructor: Sgt. Clay Cranford

Clayton Cranford is a 20-year law enforcement professional and is a retired Sergeant for an Orange County law enforcement agency. He has served as a member of a county-wide School Threat Assessment Team and the Crisis Negotiation Team. As a juvenile investigator, he has investigated threats, weapon possession, and violent crimes in K-12 schools though out Orange County, California. Clay is also the author of "Parenting in the Digital World."
